

HAZCHECK ONLINE

VALIDATE: Declared Dangerous Goods Cargo

Shippers, forwarders and agents worldwide use Hazcheck Online to validate their declared dangerous goods shipments and produce documentation.

Hazcheck Online is a web-based annual subscription service for shippers of dangerous goods by sea.

The system will automatically take you through the process of checking a dangerous goods load for shipment in accordance with the IMDG Code requirements. It will help you to identify stowage and segregation conflicts, ensure that packaging is correct and produce a dangerous goods note (DGN) when the load is successfully processed.

Easy to use and accessible from any PC, laptop or tablet device with an internet connection it is used by a wide variety of customers globally including shippers, forwarders and agents.

BENEFITS

- Simplifies and speeds dangerous goods processing – no looking through books required!
- Increases efficiency and enhances customer service – instant and accurate!
- Enables staff to quickly and efficiently produce compliant dangerous goods transport documentation
- Updated and maintained in line with IMDG Code Amendments and any subsequent errata
- Provides access to the ADR regulations for combined sea and road journeys
- Reduces error and increases operational safety

Hazcheck Online can make ADR checks when under a combined IMDG Code/ADR journey

- Specific ADR information can be viewed and checked against
- Dangerous Goods Emergency Action Code List (EAC List), 2019
- Option to include the tunnel code on the dangerous goods note
- Print off ADR instructions in writing

MORE INFORMATION

FEATURES

SUBSTANCE ENQUIRY

- Displays information on any substance or article listed in the IMDG Code Dangerous Goods List
- Enhanced enquiry features include identifying if shipments are allowed on passenger or cargo-only sailings, a substance-specific segregation table, whether the substance belongs to a segregation group as per 3.1.4.4 of the IMDG Code
- IMDG Code substance name lookup in English, French or Spanish
- Optional check on the ADR requirements for road transport when shipping under

STOWAGE AND SEGREGATION VALIDATION CHECK

- Check that substances loaded together in a container or vehicle (CTU) comply with the stowage and segregation requirements of the IMDG Code, including, at the primary and subsidiary risk level, substance specific requirements and chemical group prohibitions

PACKAGING CHECK

- Easy to use packaging checks and options, including inner and outer packaging limits and Intermediate Bulk Container (IBC) types
- Display Limited Quantity options
- Display relevant portable tank container and road tank vehicle types

LOAD VALIDATION REPORT

Create a validation report to provide details of the validation check and information on each item in the load. The report can be saved as a pdf, printed and sent via email. Many competent authorities use this feature when checking dangerous goods shipments.

PRODUCTION OF A DANGEROUS GOODS NOTE

- When all the substances in the load have been processed, produce and save a Dangerous Goods Note (DGN).
- Send it to a selected shipping line as an e-mail. An EDI message that eliminates re-keying of the information into a shipping lines' booking system can be automatically attached.

CUSTOMER COMMENTS

P&O Ferries uses Hazcheck Online for DG pre-acceptance screening.

"At P&O Ferries we are committed to providing a safe, reliable and high-quality service, and our continuous search for improvement will help ensure we remain a leading freight operator. Hazcheck Systems support this service to dangerous goods shippers in the tight schedules that our customers' business demands and to the safety standards built into all our operations."
